

The EMS Leadership Challenge

IN PARTNERSHIP WITH

REMOTE LEARNING COURSE INCLUDING PERSONAL COACHING

Do you have the passion to inspire and guide your organisation to take better responsibility for its environmental impact?

Would you like to progress further in your EMS or HSEQ career and experience job satisfaction from knowing you are making a difference each day?

Let us guide your development from EMS Manager towards EMS Leader by learning what 'leadership' within ISO14001 means, how to inspire and motivate senior colleagues others and how to adopt a leadership mindset that can make lasting change.

THE COURSE

The only UK & International course providing a practical guide with 1:1 support for EMS professionals. The course will teach you how to evolve from being an EMS process 'manager' towards being an EMS leader.

This unique online course with coaching is designed specifically for environmental & QHSE managers or advisors holding operational responsibility for maintaining and advancing the business's EMS certification.

It will be an 'out of the comfort zone' experience and is designed to challenge you to be the very best EMS leader you can be. We will work on your ability to inspire, motivate and empower. You will be coached, provided with peer feedback and challenged to undertake a leadership influencing project within your own organisation.
